AML Scanner/Decoder M2000/M6300 – USB Interface

Read these instructions before connecting the AML Scanner/Decoder M2000/M6300 to your computer. **Do not use the sofware provided by the Manufacturer.** The CD should only be used to view the User's Guide.

Connecting the cables to the Decoder box and to the Computer

> **NOTE: For Cordless Units, the manufacturer recommends that you complete the setup with the scanner directly connected to the base or receiving unit then repeat it with the scanner connected to the wireless unit.**

1. The computer should be **ON.**
2. Connect the scanner to the decoder box.
3. Connect the USB cable that came with the decoder box into the USB port on the decoder box and plug the other end of the USB cable into an available USB port on the computer.
4. After you have connected the cables, you need to configure the decoder box to work properly with The Uniform Solution.
5. Close any open programs including The Uniform Solution.
6. Download and print out the AML M2000/M6300 Decoder Setup document. Make sure you print the setup document on a good Inkjet or Laserjet printer. Read and follow the steps as outlined in the document. Place the Setup Sheet on a flat surface and scan into an open notepad document to verify your results. When setup is complete, you may test the scanner by scanning The USW and/or the UPC barcodes into the notepad to validate it function.
