

### **X-Charge Credit Card Software Workstation Setup**

The following is a guide to assist you in interfacing X-Charge Credit Card software with The Uniform Solution program.

1. You must map the workstation to the computer that has the X-Charge Credit Card software installed as a full server install.
2. Open The Uniform Solution program go to Setup > This Computer> Credit Cards.
3. Select X-Charge as the credit card processor. You will need to set the transaction folder. Click on the button with the three (3) little dots at the end of the transaction field then navigate to the xcharge folder on the computer that X-Charge is installed on (ex; s:\USW\Xcharge).
4. After you have set the transaction folder click OK to save the changes.

**NOTE:** The computer that has the X-Charge Credit Card software must be on to process credit cards on the workstation.
